

THE WESTERN CANADIAN INSULIN PUMP CENTRE SPRING NEWSLETTER

WESTERN CANADIAN
INSULIN PUMP CENTRES

WHAT'S NEW

The Western Canadian Insulin Pump Centre is working to expand its role in educating other health care professional on the Insulin pumps and Sensors. Over the last 2 years we have had a lot of experience with sensor technology and realize it can be a steep learning curve for those using a sensor.

RESEARCH HIGHLIGHTS

Our research on the Efficacy of the Internet Blood Glucose Monitoring was accepted for Abstract Presentation at the American Diabetes Association's annual meeting. The meeting will take place in Orlando, Florida on June 24-29, 2010.

A large study comparing the efficacy of the Sensor versus Multiple Daily Injections (MDI) in subjects naive to Insulin Pump therapy will be completing soon. Stay tuned for the results of this important study.

If you do not wish to receive future newsletters, please phone or email our Administrative Assistant Marina at marinac@insulinpumpcentre.com

April 2010

Highlights:

- What's new at WCIPC
- Research highlights
- Upcoming follow-up dates
- Internet Blood Glucose Monitoring

FOLLOW-UP PROGRAMS

The clinic offers a structured follow-up program for patients on an insulin pump. For more information please visit our web site. Our upcoming follow-up dates are:

- June 11, 2010
- July 9, 2010

Please call us at 604-684-2025 to book your appointment.

INTERNET BLOOD GLUCOSE MONITORING

Our Internet Blood Glucose Monitoring service allows for ongoing contact with the doctor through the Internet. If you are interested in learning more about the Internet Blood Glucose Monitoring Service, please visit our web site, give us a call or email.
